From brief to *build-ready.*

Disha Jain is a jewellery CAD designer, educator and technical consultant. Her process turns sketches and specifications into precise jewellery models made with manufacture in mind.

01

Interpret

Sketches, stone plans and references become a clear CAD brief.

02

Model

Rhino, Matrix 9 and MatrixGold turn the concept into accurate 3D geometry.

03

Refine

Proportion, settings, wall thickness and joins are resolved for wearability and manufacture.

04

Visualise

Worn and close-detail imagery makes scale, material and craft easy to judge.

TOOLS

Rhino 3D / Matrix 9 / MatrixGold / Jewellery visualisation / 3D printing

Emerald Stone Choker

NECKLACE / 2026

CLOSE DETAIL

Design intent

A close-fitting gold choker in graduated emerald-green stones, arranged in a balanced collar line.
